SIXTEENTH ANNUAL ADVANCED LICENSING INSTITUTE

Professor Geoffrey G. Dellenbaugh

January 2008

FINAL EXAMINATION

This is a two-hour, open book, open computer examination. More time will be given to qualifying ESL students. In preparing your answers, you may consult the course materials and any other materials you wish. However, your answers must be entirely your own work. Do not discuss the questions or your answers with anyone else.

Please write your answers in the blue books supplied, using only one side of each page. Number the books on the front (e.g., "book # 1 of 2") before handing them in. Remember that the answers must be read to be graded, so take care to write or print as legibly as possible!

Grading will be anonymous. Please write your examination number on the front of each book. DO NOT put your name anywhere on anything you hand in.

Grading will be on a pass/fail basis.

--- QUESTIONS ---

1) Compare and contrast issues in licensing/technology transfer of university inventions and licensing/technology transfer of inventions from government laboratories. Include consideration of co-operative research in both environments.

2) Compare and contrast the intellectual property valuation methods described by Mr. Conroy.

3) Select any three presentations (other than those of questions 1 and 2) and briefly describe insights gained or lesson learned from them. Number your answers #3, #4, and #5. Be sure to begin each answer by indicating which presentation you selected.

--- END OF EXAMINATION ---
