Inventor Assistance Source Directory

Sixth Edition
August 2000

U.S. Department of Energy
Inventions & Innovation Program

Prepared for:
Office of Energy Efficiency
and Renewable Energy
U.S. Department of Energy

FOREWORD

This *sixth edition* directory is intended for your use in locating organizations that provide assistance to inventors and entrepreneurs. For assistance providers, it may help locate others that can supplement the services you provide.

The first part of the directory is a matrix listing all the organizations by state and showing the services each provides, as well as the fields in which they have expertise. Following the matrix is a listing of each organization's address, contact person, phone, fax, and e-mail, and the cost (if any) associated with their service.

In this addition of the directory, we have included only organizations that indicated they were state, federal, or non-profit. While we recognize there are a number of for-profit entities that provide valuable services to inventors, we can no longer include them in the directory. The information contained in this directory came from datasheets voluntarily filled out by each organization. Neither the Department of Energy, nor Pacific Northwest National Laboratory specifically endorses any of these organizations or their services. This Guidebook is intended as a resource directory, not as an endorsement. **The user of this directory must take full responsibility for checking the credentials of any source of information or assistance.**

To request a copy of the directory or to make changes to the directory please contact

Margaret Axelson
